

Deborah Deatrck, MPH is a public health professional with more than 35 years of experience in developing, leading and evaluating population health initiatives, focusing on tobacco prevention and control, obesity, asthma, child health, access to care, and other issues, with a focus on multisector projects that align clinical, community, and policy interventions to improve the health of individuals and communities. Ms. Deatrck is currently a consultant on maternal and child health and community/population health initiatives, having retired in 2019 after a 20+ year career with MaineHealth as the Senior Vice President for Community Health Improvement. At MaineHealth, she co-founded the nationally-recognized Center for Tobacco Independence, the Let's Go! childhood obesity prevention program, the Health Index, and AH! Asthma Health among other population health initiatives. Prior to her tenure at MaineHealth she was executive director of a national organization that focused on shared health decision making, led a statewide health research consortium, led the state dental public health program and taught part time in several universities and colleges. She holds bachelors and masters degrees from the University of Michigan and completed doctoral level coursework in evaluation at the University of Houston and the University of Maine.

Andrew F. Coburn, Ph.D is Research Professor Emeritus, Muskie School of Public Service, University of Southern Maine, Portland Maine. Andy's research has focused on topics related to health access and insurance, Medicaid policy, and rural health. As the founding director of the Muskie School's health policy and health services research programs, he has had a long-standing commitment to the application of health services research in policy and managerial decision making. Andy was also the founding director of the Maine Rural Health Research Center, a national center funded by the Federal Office of Rural Health Policy (HRSA). Andy is currently a member of the Rural Health Action Network in Maine, a voluntary multi-sector network of leaders committed to improving the health and economic circumstances in rural Maine. With his colleague Deborah Deatrck, MPH, he recently published, *Addressing Health-Related Social Needs to Improve Rural Health: Ideas to Action*.

Barbara Masters is an independent consultant with nearly 40 years of experience in health policy development and analysis. She has worked in philanthropy, local government, Capitol Hill, and nonprofit advocacy. For the last 10 years, she has led efforts to design and implement the California Accountable Communities for Health Initiative (CACHI) on behalf of a public-private partnership between the California Department of Public Health and a funder collaborative. CACHI is a systems- change initiative that seeks to demonstrate the value of a more expansive, linked, and prevention-oriented health system. CACHI recently secured \$15M in state funding that has led to the selection of 37 community grantees that will implement the

ACH model over the next 3 years. Prior to starting her consulting practice, Barbara served as the Public Policy Director for The California Endowment. During her tenure, she led efforts to institutionalize public policy throughout the foundation's activities and developed methods to evaluate advocacy and policy change activities. Previously, she worked for two county health departments, and served as vice president of the California Association of Public Hospitals and Health Systems. Barbara began her public policy career as a legislative assistant for U.S. Senator Alan Cranston (D-CA). Barbara graduated from UC Berkeley and received her Master's Degree from University of Colorado at Boulder.

Charley Martin-Berry, Community Caring Collaborative (CCC) director

Charley Martin-Berry leads the Community Caring Collaborative, a multi-sector partnership that works to foster collaboration and improve outcomes for vulnerable populations in Washington County and Passamaquoddy communities. Her work focuses on creating community-level infrastructure that strengthens partnerships; promoting practices and policies in organizations and across systems that are effective and equitable; creating flexible financial support programs that help families build assets and reach goals; and building responsive, shared programs that align offerings across multiple agencies and, when combined, impact population-level change. She leads trainings on building community collaboration, principles of family engagement in program design and improvement, and building holistic two-generation interventions. Charley lives in East Machias and has lived and worked in Hancock and Washington County her whole life. She graduated from the University of Maine in Orono with a degree in Anthropology and Women's Studies. She also serves on the boards of visitors for the University of Maine and the University of Maine at Machias.
